

**TRACK NAME**

Green Building in the Desert - USGBC

SESSION NAME

Underfloor Air Distribution

DATE + TIME + ROOM NUMBER

Saturday Sept 6th – 3:00pm – Room 102A

SESSION DESCRIPTION

This session will educate attendees on the sustainability and LEED benefits of underfloor air delivery

Goal of the session is to have everyone walk out of the room with a firm understanding of what a raised access flooring system can provide to a project, what is required in the architectural and mechanical disciplines to integrate this system, and what the associated cost is to an owner and/or developer. This will be a presentation to introduce both the technician and layperson to the benefits of this system.

PRESENTOR(s)

Grant Groeschel – Tate Access Floors

PRESENTOR BIOGRAPHY(s)

My career and education are architectural. I've practiced in the architectural field for the past 10 years doing construction administration and project management. I am a LEED A.P and my focus is on sustainable design. I work for Tate Access Floors as a Business Development Manager. My primary role in the firm is to act as chief sustainability evangelist for the use of raised access flooring in the sustainable design community. I'm passionate about what I do and I enjoy talking to people about improving the way we build.
